FULL-STACK DEVELOPER | QA SPECIALIST

SUMMARY

Experienced Full-Stack Engineer, QA professional, and independent business owner with a focus on building resilient tools that solve real-world problems. Grounded in a strong quality assurance background—ranging from manual testing roots to modern end-to-end automation with Playwright—I prioritize robust and thoroughly validated code delivery. Highly adept at auditing full-stack applications using Postman, browser DevTools, and Google Lighthouse, and specialized in architecting systems from Electron-based desktop apps to automated Azure cloud deployments. I combine technical depth in Node.js and SQL with a rigorous testing mindset and a sharp eye for UI/UX to ensure every product is as stable and high-performing as it is intuitive.

WORK EXPERIENCE

Lead Software Engineer(Freelance), Sakura Steel Development Corp & GT Sakura Trading Surplus Mall

Jan 2026 - Present

- Directing the full-stack development of a cross-company Inventory Tracking System designed to unify logistics between the development corp and the trading surplus mall.
- Architecting a scalable desktop application utilizing Electron and modern JavaScript.
- Designing and implementing the front-end user experience using Tailwind CSS to ensure a clean, utility-driven, and consistent interface across all inventory modules.
- Taking full ownership of the project lifecycle—from initial requirements gathering to active coding—as the sole developer on the project.
- Developing and executing rigorous QA workflows, integrating Playwright for automated end-to-end testing to validate core system features and ensure software stability during the active build process.

Business Manager / Operations Lead, Donato's Space Rental

February 2026 - Present

- Oversee daily operations and tenant relations for a local rental property business, ensuring high occupancy rates and streamlined administrative processes.
- Managed end-to-end leasing workflows, including contract preparation, payment tracking, and property maintenance scheduling.
- Acted as the primary point of contact for facility inquiries, resolving tenant issues promptly while maintaining property standards and compliance.

Lead Photographer & Founder, Lumen Lens Studios

August 2025 - Present

- Capturing the big moments for clients, from the energy of a wedding to the personal feel of a portrait session.
- Handling the entire creative process, including scout locations, directing shots on the day, and the detailed editing work that goes into the final delivery.
- Building a brand from the ground up, focusing on clear communication and making sure every client feels comfortable and confident in front of the camera.

Web Developer, Almont Business Connect Inc.

July 2023 - December 2025

- Led UI and UX development in the early stages of the system. Used Bootstrap and custom CSS to build the interface. Managed design for all modules with consistent quality across the Oasis module, Visits modules, and Other Note modules.
- Managed CI and CD pipelines using Azure DevOps to ensure consistent and automated deployment of software updates. Supported a scalable cloud environment on Microsoft Azure.
- Supported Oasis validations and workflows, ensuring maintenance and updates on an annual basis.
- Led and implemented Physician Orders validation and features, including full printing workflow. Developed associated CRUD functions.
- Led and implemented Physician Orders validation and feature set, including the full printing workflow and output. Developed CRUD functions.
- Supported the Summary and Reports features for the healthcare system using ORM queries in Sequelize and custom queries in MySQL.
- Developed the patient calendar sticky note feature.
- Led validation processes for Patient Intake.

Intern Web Developer, Almont Business Connect Inc.

January 2023 - May 2023

- Contributed to the development of Healthcare Visit Notes by creating front-end components and back-end logic to support accurate patient charting.
- Assisted the development team in coding and testing new software features, ensuring all applications met functionality and quality standards prior to release.
- Collaborated with senior developers to troubleshoot and resolve technical issues, including bugs and performance bottlenecks, gaining hands-on experience in debugging complex systems.
- Authored and maintained project documentation, supporting team knowledge sharing and providing a reliable reference for future maintenance and onboarding.

Intern Quality Assurance, Almont Business Connect Inc.

January 2023 - May 2023

- Conducted comprehensive manual testing of software applications and features to verify functionality, usability, and compliance with quality and performance standards.
- Created and maintained detailed test case documentation, standardizing procedures to ensure consistent, accurate, and repeatable quality assurance processes.
- Collaborated with the development team to identify, document, and track defects through resolution, improving code quality and ensuring smoother software releases.

EDUCATION

Bachelor of Science in Information Technology

University Of Pangasinan - PHINMA

ADDITIONAL INFORMATION

- **Technical Skills:** Wireframes, Mockups, User Flows, Process Flows, Adobe Photoshop, HTML/HTML5, Bootstrap, Responsive Design, Tailwind CSS, CSS/CSS3, Python, Java, AngularJS, PHP, JavaScript, Playwright, NodeJS, Express.js, npm, RESTful APIs, Sequelize, MySQL, SQLite, PostgreSQL, Git, CI/CD, and Azure DevOps, Electron, Photography, Digital Post-Processing (Lightroom), Business Operations, Project Management.
- **Languages:** English and Tagalog
- **Awards/Activities:** Received the "Rookie of the Year" award for outstanding performance.
